

Dear Friends, it is an Honor for me to postulate on behalf SOFRAMAS to be a member of the executive committee of ESAM.

I have always been enthusiast with Aeronautic and Space but ultimately became a Doctor , many years after my first specialisation in Obstetrics and Gynecology I decided to satisfy my other passion and graduated a capacity of aerospace medicine .

I discovered therefore another world with different activities and societies including SOFRAMAS , ASMA and ESAM. I joined the executive committee of SOFRAMAS in 2013 and presented some of my work at various sessions of SOFRAMAS and ASMA .

My interest in space medicine led me to integrate the space medicine group of ESAM. Along my usual clinical activity of Obstetrics and Gynecology I have since 2012 a regular activity as an AME for Class 2 pilots in France and as a medical advisor for Air France for specific gynecologic and obstetrical situations.

Working in the field at the level of Europe and representing SOFRAMAS is one of the challenges I will be proud to undertake.
